## SKILLS

Javascript (ES6), CSS, HTML, Express.JS, Node.JS, NPM, SQL, React, Redux

## PROJECTS

### [Triphikers](#) Capstone application

*Traveling website that connects users from all over the world to connect, message, share photos, and join on upcoming trips*

- Deployed live with Netlify in frontend that connects with a heroku deployed backend/database
- Fetches and sends data to multiple API's including many Google resting APIs as well as Google's firebase/firestore
- JavaScript as primary programming language, JSX to incorporate JS & HTML in same components, CSS to style components responsively, employs React hooks for stateful components to store calculator memory, Node JS to execute backend code for front end to fetch, implements SQL to maintain/manage local database, Axios to fetch backend/resting API requests, npm packages for complex components

### [COVID Near US](#) (Live Code, Github) Pursuit Hackathon Award-winning app for Most Ambitious

*A quick streamlined information interface about the latest COVID news, phases, rules, and local testing sites in the US*

- Utilized API calls from Twitter for official Department of Health information, current COVID-19 news by each State
- Leveraged Google Maps API for routing users to the local COVID testing sites, charts JS for displaying stats and sharing social media
- Implemented React Hooks to pass valuable information amongst pages; installed packages via npm that allow further customization and integration
- JavaScript as primary programming language, JSX to incorporate JS & HTML in same components, CSS to style components responsively, employs React hooks for stateful components to store calculator memory, Axios to resting API requests, several npm packages to display information graphically and in feed, hosted live in Netlify

### [Personal Reddit Clone Project](#)

*Reddit-like application allowing users to create a community, post images/videos, comment, and upvote content*

- Used SQL to store users' information and content
- Built the frontend using React to connect and display an interface that simulates Reddit
- Incorporate React Hooks to fetch various API calls to SQL database, creating, storing, and retrieving all data.
- JavaScript, JSX, CSS, React, SQL, Axios
